

Entraguard Platinum

Integrated Telephone Entry System

ENTRAGUARD™ Platinum

- Stand-alone functionality or seamless integration with Keri's access control system and *Doors* software for real access control+telephone entry
- Scalable font (3/8" or 1/2") for selectable 7 or 10 name display with up to three programmable, scrolling messages
- 5,000 tenant capacity on all units, customer doesn't pay for extra memory capacity
- Card access for 2 doors can be added by mounting a PXL-500 *Tiger Controller* and SB-593 *Satellite Expansion Board* inside
- Up to 6 digit directory code, up to 15 digit phone numbers
- Networkable to manage multiple doors via RS-485
- Rugged Stainless Steel Enclosure
- Camera, No Phone Line, Handset, Hooded Enclosure, Recess-Mount Kit options
- LED lighting, no bulbs to replace

The *Entraguard Platinum* is the newest in Keri's *Entraguard* telephone entry product line, with the largest capacity and biggest display Keri offers. The *Platinum* has a 5,000 tenant capacity, more than enough to handle nearly any large project, and also has two large font sizes, 3/8" for ten name display and 1/2" for seven name display, adjustable on demand by the visitor. This entry panel is available at a price well below competitive large capacity systems on the market. The unit is designed for durability and weather resistance with a tough 14-gauge stainless steel enclosure. Recess mount kit, hood, camera, handset, and No-Phone-Line are available as options. Additionally, the *Platinum* can also be fitted with a PXL-500 *Tiger Controller* and SB-593 *Satellite Expansion Board* to provide 1 or 2 door card access capability within the unit itself. Each unit can be programmed with three rotating messages for display. Also, this integration now brings the added benefit of integrated digital video and a powerful new feature, *Video TeleTrack* (in conjunction with Keri's *Visions* Digital Video system), whereby an Operator can view a historical video report of any vehicle at the gate, associated with the tenant who granted access — **On Demand!**

Like its sister products, the *Entraguard Gold*, *Titanium*, and *Silver*, the *Platinum* provides the best telephone entry/access control marriage available by letting the *Entraguard* function as a node on a PXL controller network and putting both functions under the acclaimed **Doors** software umbrella. Each *Entraguard Platinum* also has two extra relay outputs that can be used in a variety of ways, including turning on a lobby light, unlocking an interior door, etc., by tone commands from the tenant's location or based on an access granted decision. An on-board modem is also included for remote programming.
